# -Outline for Mobile App Mock-Up-

Mobile Application: Topography Selector
Put your iPad Camera up to a scene.
Click on an icon to add or Subtract Trees, Hills, Water to
see a new view

Remove Trees to get a better view.

-Remove Hills to uncover Sources of Water-

Animated: Maybe if this was compiled in Final Cut, map areas could be constructed in a three-dimensional frame that articulates mountain heights and water depths. I am considering this to be a survival
