

Capstone Pitch

Caitlin Trafton

There is a whole lot I would like to do with my Capstone, main objectives:

Strengthen Communities by:

Bringing "out of daters" up-to-speed on Computer/Internet Connections

Encourage Small Business in the State of Maine

←Start at Ground Level→

Most Fishermen want to work for themselves, and they pretty much do. Winters in Maine are difficult.

Laws Restrict Fishermen to Process their own Shellstock.

Marketing: Flyers, Business Cards lead to Website.

Website is the bare minimum.

The idea that might not be aparent, is to encourage licensed fishermen to sell for themselves.

Problem: "No one is going to eat as many clams as I can dig."

This is where I come in:

A Clam Digger can sell his/her shellstock out of their residence.

My Website would be a framework that accepts personal photos from Diggers that-when uploaded-appear as a 3-dimensional room.

An interactive website made with Javascript that responds as the User interacts with it, all on one page.

Replace the Middle Man with a Computer.
